APPLICATION FOR FRONT-END DEVELOPER

Dear Hiring Manager,

My name is Synne Stormdalshei and I come from a small town in Northern Norway; I have been living in Oslo since 2018. Currently I am working as an on-call fraud analyst.

I am applying for the position of front-end developer. I have been studying front-end development for the past two years and I am very excited about the opportunity to apply for this position. Since deciding to change career path, I have been passionate about writing code that bring concepts to life. My career goals are to continue to learn and grow in this field, and I know that this position will further strengthen my knowledge and give me valuable experience.

During these years as a student, I have mastered skills such as HTML5 and CSS3. I have a fair bit of knowledge in JavaScript, and I am still trying to master it. I am confident in using tools such as Git & GitHub, VSCode and Figma. I have a bachelor's degree in early childhood education and have 6 years of experience working as an educational leader in kindergarten.

When I have not been studying, I have practiced my skills on different platforms for learning. I have a few certifications from Scrimba and am currently working on The Odin Project.

I know that I can contribute to good work ethic, positivity and unique skills in both development and from previous work experiences. Thank you for considering me for the position and please feel free to contact me if you have any questions about my application or want to discuss credentials further.

Best Regards,
Synne Stormdalshei
